

Theodosios Sapounidis is currently an Associate Professor at the Department of Philosophy and Education at the Aristotle University of Thessaloniki and teaches lessons related to educational technology. He first graduated from the Department of Electronics Engineering in 1996, and then in 2002, he also graduated from the School of Electrical and Computer Engineering of Aristotle University's Polytechnic School. He gained a Master's Degree in Informatics before continuing to a Ph.D., where his thesis focused on using objects to help children learn the basic programming principles. He is co-founder and CEO of DuckyCode P.C., a spin-off company at Aristotle University of Thessaloniki that develops educational robots and tangible/graphical programming languages. He was granted four Design patents and one Trademark in Europe, along with one Utility patent and one PCT. Theodosios is also founder of the "Lab of Educational Technologies and Robotics" at Aristotle University of Thessaloniki. During his career, he received many awards. In detail, the Cubes Coding proposal won two international prizes, and recently, the project Robotiles, consisting of a smart robot and a fully interactive tangible programming language, won four national and international awards. All the awarded projects he created were used in schools and international events and were related to educational systems, robots, and tangible programming languages. Theodosios was Assistant Professor at the Department of Information and Electronic Engineering at the International Hellenic University and has worked on over 20 research projects in the Schools of Medicine, Informatics, Engineering, Psychology, Philosophy and Education, serving both as senior researcher and coordinator. He has also worked for the Greek Institute of Metrology and he was a lab assistant at the Electronics Engineering Department of ATEITH for over 10 years. Finally, for more than 15 years he was a Laboratory Teaching Staff at the School of Philosophy and Education, Aristotle University of Thessaloniki (AUTH), teaching educational technologies.
